

Your "EZ Trellis" comes complete with two collapsible "EZ Trellis" panels, two sleeves, two ground stakes & one sq. cast iron cap. Installation of your trellis is very simple and easy! **Please read & follow these simple easy steps prior to installation:**

STEP 1 :

Pull apart your two "EZ Trellis" panels so they are nice and straight.

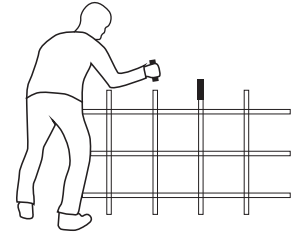

Important Note:

(Be careful not to pinch your fingers when pulling the panels apart or when closing for storing your "EZ Trellis"!)

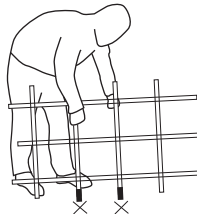

STEP 2 :

Slide the two ground stakes on to the ends of your trellis (preferably the two middle trellis pieces)

STEP 3 :

Gently push down on the trellis to make a slight indentation or mark into the soil with the ground stakes.

STEP 4 :

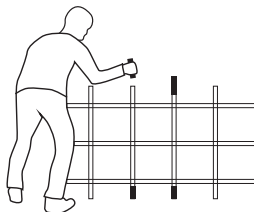

Remove the ground stakes from your trellis and place one ground stake over each mark in the soil. Now place the sq. cast iron cap over the end of the ground stake and use a hammer or mallet to hammer the ground stake nice and straight into the soil until it is deep enough to be very solid, secure & stable (approx. +/- 3" above the ground. Not wobbly!). Try to keep each ground stake as level as possible to each other.

Important Note: *The sq. cast iron cap must be used to prevent the ground stake from being damaged by the hammer when hammering the stake into the soil.*

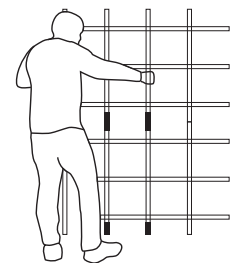

STEP 5 :

After each ground stake is hammered into the soil at your desired level depth (approx. +/- 3" above the ground), slide each end of the trellis panel back into the ground stakes. Congratulations! Your "EZ Trellis" should be now successfully mounted in your soil and should be very secure & stable!

STEP 6 :

To add-on your next "EZ Trellis" panel for more height as needed, simply slide each of your two sleeves (included) on to the ends of your bottom trellis (preferably the two middle trellis pieces) and then slide your next "EZ Trellis" panel into those sleeves so they match up and everything is in alignment! So simple it's Easy! Congratulations! That's it and you're done! **Gardening Made Easy!**

Note: *If you would like to add an optional third or fourth "EZ Trellis" panel for even more ht. as needed, please follow Step 6. You can purchase additional "EZ Trellis" extension panels w/ sleeves sold separately as needed.*

Caution: (Use Common Sense! - Proper Safety Standard Approved Protective Eyewear & Gloves Should Be Worn To Prevent Injury!)

1.) Please use care when opening and closing your "EZ Trellis" panels & when sliding on & off of the sleeves and stakes to prevent any splinters or pinching of your fingers, hands, etc.

ground stake or damage to the ground stake will occur! Please be careful & watch your fingers and hands when hammering in your ground stakes using your hammer! Common Sense!

2.) Please use the cast iron cap (included) when installing the ground stakes into the soil to prevent damage of the ground stakes using your hammer. DO NOT hammer directly on the

3.) Please keep trellis panels out of reach of children or pets etc. to prevent suffocation or any other harm, injury etc. which can occur due to negligence by the owner.
